

I understand that you are considering expanding the LPFM service thereby blocking current FM translator service. Consequently, you would be taking away my favorite radio station, KLOVE which broadcast at 91.1 in the Denver, CO. KLOVE is the only radio station I can listen to with my children. I don't have to worry about foul language, people talking about women having sex with other women, cheating on your husband, or a shock jock explaining how he put mayonnaise on a stripper's ass and then threw bologna at her. KLOVE provides a valuable service to the community. Not only does it provide quality, clean entertainment but also gives information on community events. It encourages people to be moral and develop character. Perhaps you should try listening to it. I think it shows a seriously lack of judgment on your part even considering replacing this station. I don't want another radio station with another sex-crazed, immature, 40 year old man incapable of growing past the mental age of 13, that sees women as sex objects to be used for his humor. There is enough of that crap on radio and TV already. KLOVE serves the local community by providing an alternative to the manure the rest of the radio stations are shoveling. They bring the community together for community drives, service projects, and yes, praising God. They also provide an important message for our children. Need I remind you they are the leaders of tomorrow. I believe that KLOVE serves the public interest by providing clean, family entertainment, information regarding our community, news from a Christian perspective, and in-depth discussions on subjects that affect the entire community. You should be ashamed of yourself for even considering this change. Don't you have anything better to do, like monitoring Janet Jackson for instance? DON'T TAKE AWAY MY KLOVE!!!!
